Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-19 rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al. (US Patent No 6,134,584).

3. In reference to claims 1 and 6, Chang teaches a web page acquisition system and provider, the system comprising:

a web page acquisition server and a user terminal, both of which are connected to a communication network, wherein said user terminal transmits to said web page acquisition server a web page acquisition request that includes various acquisition conditions; and wherein, in accordance with said acquisition conditions included in said web page acquisition request received from said user terminal, said web page acquisition server acquires a web page source from a web server on said communication network and transmits said web page source to said user terminal (Summary, column 2 lines 20-67, column 6 and column 7 lines 1-25, Chang discloses a destination entity as a proxy server for retrieving web pages and a user system. The

Art Unit: 2157

user requests data and web pages along with specified download preferences from a destination entity. The destination entity retrieves the web data and transmits it to the user.)

4. In reference to claim 2, Chang teaches web page acquisition service system according to claim 1:

wherein, as one of said acquisition conditions included in said web page acquisition request, said user terminal designates a time condition for the acquisition of a web page source (Summary, column 2 lines 20-67 and column 6 lines 1-40, Chang discloses a user specifying and scheduling when to download web data); and

wherein, in accordance with said time condition designated in said web page acquisition request, said web page acquisition server acquires said web page source and transmits said web page source to said user terminal (Summary, column 2 lines 20-67 and column 6 lines 1-40, Chang discloses the destination entity fulfilling the user request).

5. In reference to claims 3 and 4, Chang teaches web page acquisition service system according to claim 2,

wherein said web page acquisition server performs scheduling for the acquisition of a web page source, while taking into account said time condition that is designated in said web page acquisition request and the volume of the communication traffic carried by said communication network (Summary, column 2 lines 20-67 and column 6 lines 1-40, Chang discloses the destination entity fulfilling the user request taking into account the scheduled time and also communication traffic volume. The destination entity acquiring and transmitting the web data to the user).

6. In reference to claim 5, Chang teaches web page acquisition service system according to claim 1,

wherein, when said web page acquisition server receives from a plurality of user terminals a plurality of web page acquisition requests for the same page, said web page acquisition server obtains and archives a corresponding web page source for said plurality of requests, and transmits said web page source to said user terminals that issued said web page acquisition requests (Summary and column 2 lines 20-67, Cheng discloses destination entity as proxy server and a plurality of users requesting same web page, where the proxy stores the page and transmits it to the plurality of the requesting users).

7. In reference to claims 7 and 8, Chang teaches provider according to claim 6, wherein said transmission control unit forms into a library file said web page source that, in accordance with said web page acquisition request, is obtained and held in said web page acquisition/archiving unit, and transmits said library file to said user terminal (Summary, column 2 lines 20-67 and column 6, Cheng discloses proxy storing a web page in a cache which would inherently be a file and transmitting it to a requesting user).

8. In reference to claim 9, Chang teaches provider according to claim 6, wherein said transmission control unit changes a link for said web page source held by said web page acquisition/archiving unit from an absolute link based on the URL of a web page source, into a relative link (Summary, column 2 lines 20-67 and column 6, Cheng discloses proxy storing a web page in a cache which would inherently change the link from an absolute URL to a local/relative link).

9. Claims 10-19 do not teach any new limitations above claims 1-9 and are therefore rejected for the above mentioned reasons.

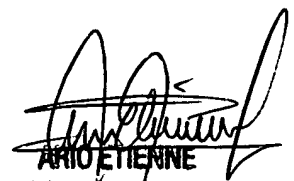

10. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.
